

AI Usage DISCLOSURE FORM

1. Team Details

Team Name: Cosmos

Project / Product Name: Life Pilot

Organization / Institution (if any): RV College of Engineering, Bengaluru

Submission Date: 8 May 2026

2. AI Usage Declaration

Did your team use any Artificial Intelligence (AI) in developing this project? Yes / No

Yes

3. Purpose of AI Usage (Brief Details)

Idea generation / brainstorming _____

Code generation or assistance Yes

UI / UX design Yes

Content creation Yes

Data analysis _____

Testing / debugging _____

Other _____

4. Feature Origin Classification (Please add/delete based on the number of the feature)

1. Feature Name Context & Intent Detection Engine

Self-Generated/AI-Generated/Both Both

Description (Include AI tools/platform Used, prompt used, Output Summary, Modification):

Purpose:

Continuously understand:

- What the user is doing
- What the user is likely trying to do
- How urgent the situation is

AI models used:

Task	AI Tool
Intent Classification	TensorFlow Lite
Pattern Detection	Scikit-learn
Sequence Prediction	LSTM / GRU
Stress Detection	TinyML models

Output:

Intent Score: 0–100 probability score.

Examples: 92 → rushing to class

30 → relaxed at home

2. Feature Name Delay Prediction

Self-Generated/AI-Generated/Both Both

Description (Include AI tools/platform Used, prompt used, Output Summary, Modification)

Predict:

- Late arrival probability
- Traffic impact
- Habitual delays

AI Models:

- XGBoost
- Random Forest
- LSTM time-series prediction

Output:

Risk Level	Meaning
Smooth	No issues
⚠ Watch	Small risk
Conflict	Likely problem
Critical	Immediate intervention

3. Feature Name Digital Twin System

Self-Generated/AI-Generated/Both Both

Description (Include AI tools/platform Used, prompt used, Output Summary, Modification)

Purpose: Create a virtual AI version of the user.

AI Models:

Purpose	Tool
User Profiling	Embedding Models
Pattern Mining	Clustering Algorithms
Adaptive Learning	Reinforcement Learning

Storage: SQLite (offline)

Firestore / Supabase (cloud sync)

4. Feature Name What-If Simulation Engine

Self-Generated/AI-Generated/Both Both

Description (Include AI tools/platform Used, prompt used, Output Summary, Modification)

Purpose: Allow user to simulate future outcomes.

AI Models:

Task	Tool
Scenario Simulation	Monte Carlo Simulation
Timeline Forecasting	Temporal AI
Optimization	Constraint Solvers

Output:

- Delay propagation
- Energy impact
- Stress increase
- Miss probability

5. Feature Name Smart Timeline Dashboard

Self-Generated/AI-Generated/Both Both

Description (Include AI tools/platform Used, prompt used, Output Summary, Modification)

Timeline View:

Shows:

- Events
- Risks
- Free time
- Travel windows

Metrics: Daily Health Score

Calculated using:

- Sleep
- Workload
- Delays
- Focus level

UI Stack:

Platform	Tool
Mobile UI	Flutter
Charts	fl_chart
Animations	Rive / Lottie

6. Feature Name Passive Context Actions

Self-Generated/AI-Generated/Both Both

Description (Include AI tools/platform Used, prompt used, Output Summary, Modification)

Purpose:

- Auto-send status message
- Open study apps
- Mute notifications
- Turn on Bluetooth while driving

Android APIs:

Intent System

Broadcast Receivers

Automation APIs

7. Feature Name Smart Mode Switching

Self-Generated/AI-Generated/Both Both

Description (Include AI tools/platform Used, prompt used, Output Summary, Modification)

Modes:

Mode	Trigger
Study	College + class time
Home	Home geofence
Travel	Driving detected
Sleep	Bedtime pattern

5. Ethical & Compliance Confirmation

AI usage complies with guidelines and policies. **Yes**

No proprietary or copyrighted data is misused. **I Agree**

6. Declaration & Sign-Off

Name of Team Representative: Kiran S K

Role: Team Leader

Signature:

A photograph of a piece of paper with the handwritten signature "Kiran, S, K" in blue ink.

Date: 8/5/2026
